In response to the feedback on the IE 2010-2011 Report, the following bullets describe how the department will address the comments in our next assessment cycles and resulting reports.

- The goal of achieving a 4.4 on the sportsmanship rating was selected as the end goal over a 3 year assessment cycle. Essentially, the progress of this goal will be tracked and reported on in 2011-2012 and 2012-2013 to document a cycle of three years to ultimately hit a 1.0 increase. If we do not meet that goal by 2013, then we will need to determine what a reasonable benchmark is to have the best possible student experience in Intramural Sports.

- Intentional and explanatory sportsmanship criteria has been addressed in our 2011-2012 plan regarding a clear action step to review the sportsmanship criteria with captains and to directly state that supervisors and other captains will be rating each team. We did not do this in 2010-2011 and so this is what will happen as a follow up measure to that feedback. This action step will be listed in our 2011-2012 report.

- Students who participate in fitness classes will be the phrase that replaces “fitness students” in the 2011-2012 report and any future reports for the sake of specificity.

Thank you.
